Why boosting nitric oxide promotes a healthy heart, razor-sharp memory, and nonstop energy

When your body produces plenty of nitric oxide, it does many incredible things for your health. For example, it...

- ▶ **Tells** arteries to relax so they open wider and blood flows freely promoting healthy blood pressure and slashing your heart risks!
- ▶ **Fuels** your body with a long-lasting energy surge, boosting your stamina and performance!
- ▶ **Wakes up** your brain to send and receive signals more quickly, so you can think faster on your feet and feel more alert!
- ▶ **Boosts** the formation of bone while slowing down bone breakdown, so your bones can stay strong and healthy!
- ▶ **Promotes** healthy cholesterol levels to keep your arteries clear and support heart health!
- ▶ **Signals** your immune system to kill bacteria, viruses, and other dangerous invaders!
- ▶ **Lifts** your mood and sense of well-being, so you get more joy out of life!
- ▶ **Allows** your muscles and joints to recover faster, so you can keep active and move freely!
- ▶ **Eases** stiff arteries and helps protect your heart after exercising!
- ▶ **Helps** you walk longer distances more easily, without getting tuckered out!
- ▶ **Enhances** circulation by stimulating blood flow all over your body!
